## PROJECT: Folklore & AI Cultural Preservation Study Expert Validator Instructions

**Thank you for assisting with this research.** Our goal is to understand how well Artificial Intelligence (AI) preserves the cultural and narrative integrity of Bengali folktales when **retelling them in Bangla and English**. We need your human expertise to validate what is authentically present in these stories and what might be lost or changed.

---

## YOUR TASK

You have been assigned a set of stories. For each story folder, you will find a **Bengali version** and an **English version**.

1. **Read one version completely** (e.g., read the Bangla PDF).
2. **Open the corresponding Annotation Form** (Google Doc/Word).
3. **Fill out the form** based *only* on the text you just read. Do not "fill in the blanks" from your own memory of the tale; record only what is written on the page.
4. **Repeat** for the next version (e.g., English) before moving onto the next story.
